

git

This is a personal collection of useful git commands and tools

git cola

<https://git-cola.github.io/downloads.html>

compare current file to a previous committed file:

Install kdiff3 with

```
sudo apt-get install kdiff3-qt
```

and then get commit head with

```
git log
```

and now you can run for example

```
git difftool 4fb7737350cc0b646177cb0a041fc73422ffc98a main.c
```
