

Manual Page order in Eeschema

24.9.2014

Link to Launchpad blueprint: <https://blueprints.launchpad.net/kicad/+spec/manual-page-order>

Summary

When one draws a hierarchical schematic, it would be usefull to set the page-order manually. This is usefull for logical reasons, and important for printed versions of the schematic. The order now is automatically set on annotation, but it seems to be more or less random.

Example

I have a schematic with following sheets:

- root (overview)
- board connectors
- power supply
- digital (microcontroller, flash, IO, ...)
- ADC

External Tool since 2015-03-07
