

PGP Tool

This tool allows a very simple usage of asymmetric encryption/decryption with PGP/GPG-Keys on any typical operating system.

Instructions

Here are simple instructions to send some secret to me:

<https://pgptool.github.io/>

The screenshot shows the PGPTool website with a dark theme. At the top, there is a navigation bar with links for HOME, DOWNLOAD, SCREENSHOTS, HELP, FAQ, and CONTRIBUTE. A red box highlights the text "Download and run PGPTool from <https://pgptool.github.io/>". Below this, the word "DOWNLOAD" is prominently displayed with a lightning bolt icon. The main content area explains that the application requires Java Runtime Environment 1.8 and provides instructions for Windows and MacOS/Linux. The Windows section includes a green "Download" button (~14mb). The MacOS/Linux section includes a code block with the command `java -jar pgptoolgui-0.5.4.0.jar` and another green "Download" button (~14mb).
