

- Industrietaugliche I/O-Karten für Microcontroller
- Handy-Ladekabel mit Backupfunktion
- LCD with GPU from Vizic Technologies
- Tinkerforge Baukastensystem, nicht günstig, aber einfach
- A software defined radio, OSHW, 328 USD, with free video-lessons
- Industrial Arduino Modules
- ILI9341 SPI color LCD (about 6€ on eBay)
- Rigol DP832 tripple power supply, recommended by Dave Jones, starting from 349€
- SMT Proto Board from Olimex
- Olimex Stencil Printer, SMD Maske
- xMOS - Multicore microcontrollers for realtime applications
- ROOT data analysis framework (open source)
- Temperature controlled soldering iron, 5 Tips, 220VAC for 12€
Unfortunately it is not temperature-controlled. With the dial only the power is set.
- BAKON 950D, professional soldering station, 75W, very fast, for 35€, 5 tips (T12) for 13€
- Silego Silicon LEGO, programmable mixed signal chips. sounds very nice, but until now, I have no idea, where I would like to use it. Development Software is written in Qt, and leaves a very professional impression. It is available for all three major operating systems.
- Pixy - Open Hardware Camera with Object detection, 50 fps (!!!)
- Nextion LCDs, UART-Interface, WYSIWYG
