

Merge many JPG-Files into a single PDF

30.12.2014

```
sudo apt install imagemagick
```

Again we use here imagemagick in a very simple form:

```
convert *.jpg output.pdf
```

Merge many PDF-Files into a single PDF

```
pdfunite *.pdf out.pdf
```

Or by using PDF-Shuffler

```
sudo apt install pdfshuffler
```
